

*Taxodium distichum*  
**Bald Cypress**

Form: Columnar to Pyramidal;  
Irregular and picturesque in maturity

Fruit: Cone, Purplish turning to Brown

Fall Color: Bronze, Late

Tolerates: Salt, Pollution, Drought,  
Shade, Flood, Wind

Growth Rate & Size: Moderate; Large

Native Region: Eastern US

Notes: Exceptionally wind firm; Very  
adaptable, except high pH soils;  
Worthwhile everywhere from  
roadsides to parks & large estates;  
Spectacular in groups and groves;  
Distinctive "knees" form when planted  
in wet areas
